ABOUT AVIDBOLT

Your Digital Transformation Partner

Avidbolt Solutions is a technology consulting firm built around one goal: helping growing companies get more value out of the platforms that run their business. We work across Salesforce, SAP, ServiceNow, and Microsoft Dynamics 365 — designing, building, and supporting the systems that connect sales, service, operations, and finance into one coherent picture.

Rather than treating each rollout as an isolated project, our certified consultants look at how your teams actually work day to day, then architect a platform that removes friction instead of adding another tool to manage. The result is technology that keeps pace with your growth instead of slowing it down.

Why Companies Choose Avidbolt

Certified, Hands-On Experts

Every engagement is led by certified consultants who configure and build — not just advise.

Process, Not Guesswork

A disciplined five-stage delivery process keeps every project on time and on scope.

Support That Doesn't Disappear

We stay engaged after go-live with managed services, training, and fast troubleshooting.

Multi-Platform Depth

One partner for Salesforce, SAP, ServiceNow, MS Dynamics, and the integrations between them.

WHAT WE DO

Core Services

Salesforce

Implementation, consulting, custom development, and managed support across Sales, Service, Marketing, Health, and Financial Cloud — plus integrations that keep Salesforce talking to the rest of your stack.

SAP

From FICO and SD to S/4HANA migrations and SAP BTP, we help enterprises modernize core ERP processes and connect them cleanly to cloud services.

ServiceNow

ITSM, ITOM, CSM, SecOps, GRC, ITAM, and HRSD implementations that turn scattered service requests into a single, well-governed workflow.

Microsoft Dynamics 365

Business Central, Sales, Marketing, Customer Service, Field Service, and Project Operations — configured around how your teams actually sell and deliver.

App Development

Native and cross-platform mobile apps in Android, iOS, Flutter, and Kotlin, built to plug directly into your CRM and ERP systems.

Cloud Development

Cloud-native application development and migration services that move legacy workloads onto modern, scalable infrastructure without disrupting the business.

FLAGSHIP PRACTICE

Mastering the Salesforce Ecosystem

We bring hands-on, certified expertise across the full Salesforce platform — not just the modules everyone knows.

Salesforce Services

- Implementation — architecture, configuration, and adoption support
- Consulting — process audits and measurable improvement plans
- ISV Development — AppExchange-ready builds that pass security review
- Managed Services — ongoing monitoring, upgrades, and troubleshooting
- Integration — connecting Salesforce to ERP, marketing, and automation tools
- Support — responsive L1/L2 support to keep users productive

Clouds We Implement

Sales Cloud	Service Cloud	Marketing Cloud
Health Cloud	Financial Cloud	Data Cloud
Experience Cloud	Account Engagement / Pardot	Einstein AI Services

HOW WE WORK

Our Development Process

- 01

Discovery & Strategy

Understand your current setup, goals, and constraints before any design work starts.
- 02

Design & Architecture

Map out the technical blueprint, data model, and integration points.
- 03

Build & Configuration

Develop, configure, and integrate the solution in iterative, reviewable stages.
- 04

QA & Testing

Full user acceptance testing before anything reaches production.
- 05

Launch & Training

Go-live support, data migration, and hands-on training so your team is confident from day one.

Industries We Serve

We tailor every engagement to the specific rules, workflows, and pressures of your sector.

Healthcare	Education	Field Services	Finance
Real Estate	Energy	Retail	Insurance

LEADERSHIP

The People Behind the Platform

Our certified architects and consultants don't just implement platforms — they stay accountable for the outcomes.
